

Running the LLC Automation Macro: A Step-by-Step Guide

Alexander M. Pretka
Pennsylvania State University

Step 1) Open Google Chrome and navigate to: https://www.absecom.psu.edu/splash/eLiving_staff.

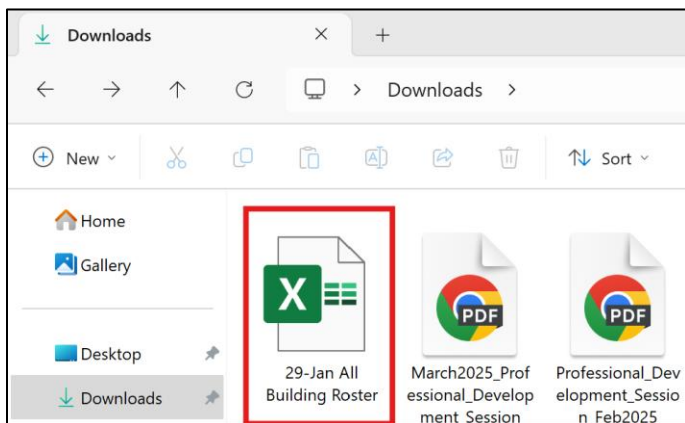

Step 2) Login using your Penn State credentials. Once the page loads, click on the 'Assignments' tab.

Step 3) Download the entire campus-wide roster for University Park.

Note: I cannot show this step since I do not have admin privileges in eLiving. However, the roster will take approximately 20 minutes to download in Google Chrome due to the file size and eLiving data extraction processing requirements.

Step 4) When the roster finishes downloading, you can locate the file in your 'Downloads' folder in the File Explorer application. It will be named in this format: **Day-Month All Building Roster.xls**. Open the file.

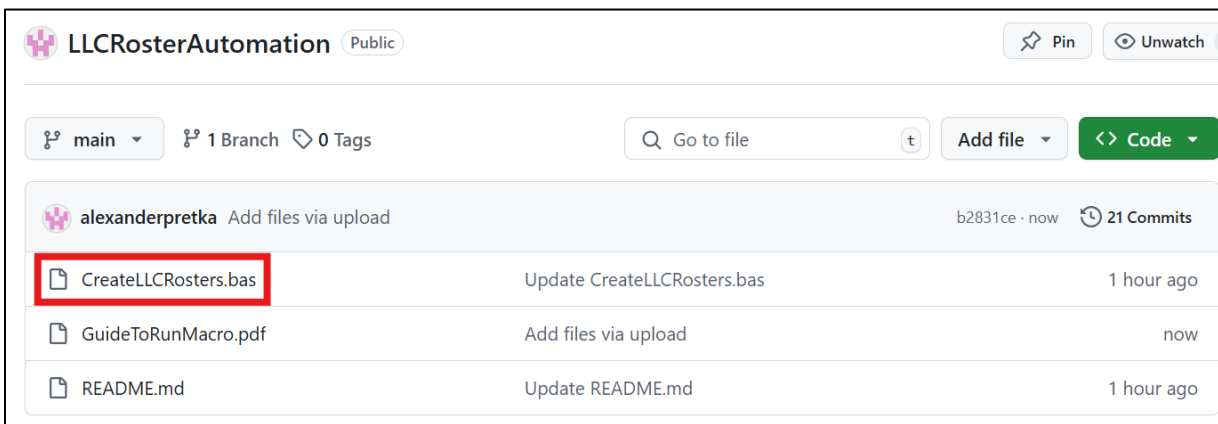

Step 5) Open a new tab in Google Chrome and navigate to:
<https://github.com/alexanderpretka/LLCRosterAutomation>.

Step 6) Click on the **CreateLLCRosters.bas** file link.

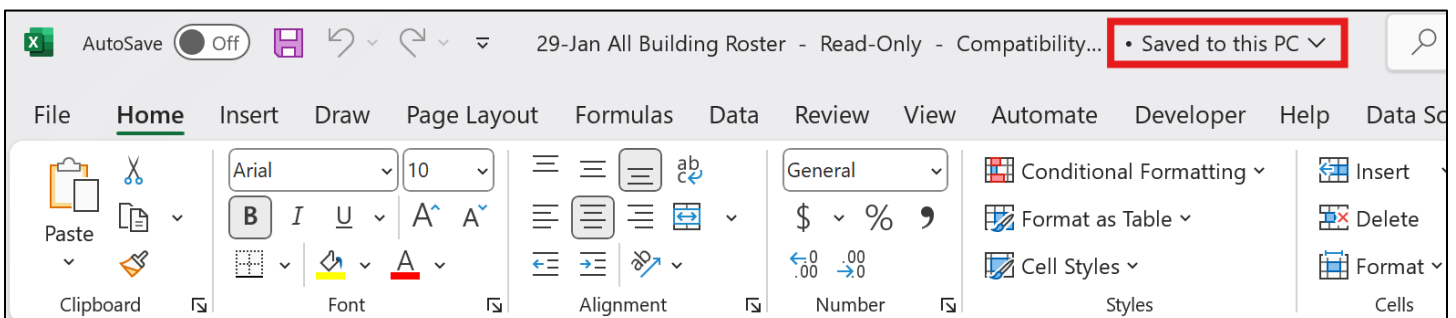

Step 7) Click on the 'Download raw file' icon.

Step 8) Go back to the **Day-Month All Building Roster.xls** file and click on 'Saved to this PC.'

Stop! Please ensure you are using the desktop version of Excel, as the web version does not support macros.

Step 9) Click on 'Convert.'

File name
29-Jan All Building Roster.xls

Location
QJ3L0TMO

Sensitivity
Unsupported

This document is saved with an older file type with limited functionality. Choose a modern file type to enable sensitivity labels.
[Learn more](#)

Convert

Note: For the macro to function properly, we need to convert the .xls file to the .xlsx file format. If your file is already converted to the **Day-Month All Building Roster.xlsx** modern file type, you will not see this message and can skip **Steps 9 to 11**.

Step 10) A 'Save As' window will appear after clicking 'Convert.' Click on 'Downloads', rename the file to *Day-Month All Building Roster NEW*, and then click on 'Save.'

Save As

Downloads

File name: 29-Jan All Building Roster NEW

Save as type: Excel Workbook

Authors: Alex

Tags: Add a tag

Save

Step 11) A message will appear. Click on 'Yes.'

Microsoft Excel

The workbook conversion to the current file format completed successfully. To use the new and enhanced features of the current file format, you must close and reopen the workbook. Do you want to close and reopen the workbook now?

Yes

No

Step 12) Click on the 'Developer' tab.

Note: If you do not see the 'Developer' tab on your Microsoft Excel, follow these steps to enable it:

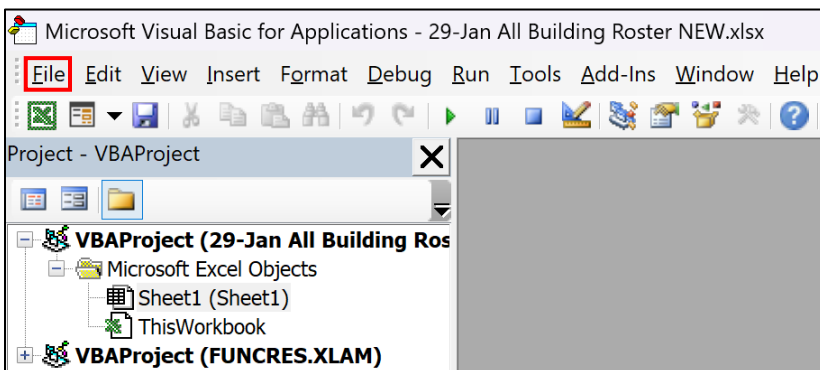

1. Go to the "File" tab in the top-left corner.
2. Click on "Options" at the bottom of the menu.
3. In the Excel Options window, select "Customize Ribbon" from the left sidebar.
4. On the right, under Main Tabs, check the box next to "Developer".
5. Click OK to save the changes.

Step 13) Click on 'Visual Basic.'

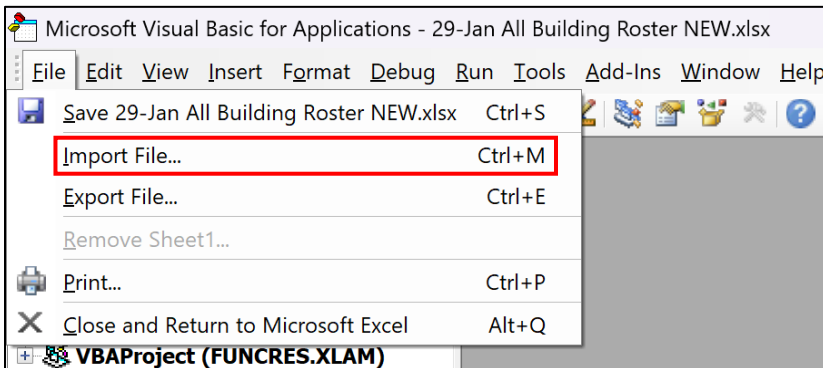

Note: This will bring up the VBA editor in a new window.

Step 14) In the VBA editor, click on 'File.'

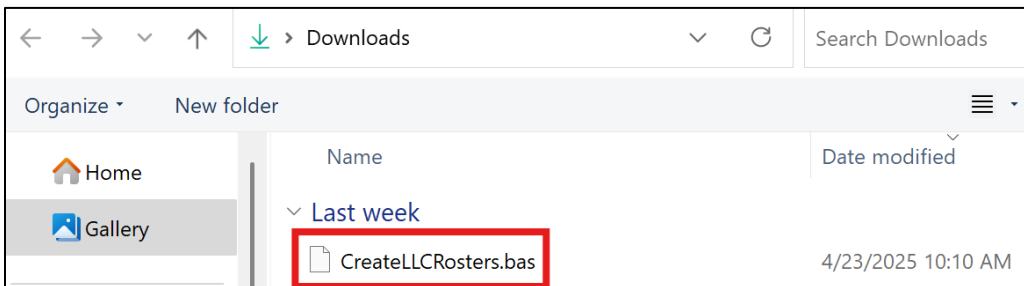

Step 15) Click on 'Import File...'

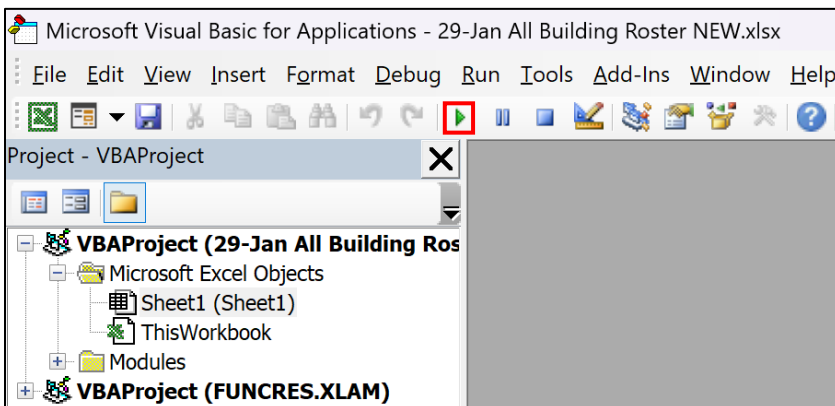

Step 16) Select the **CreateLLCRosters.bas** file.

Note: This is the file we downloaded from GitHub in Step 7.

Step 17) Click on the 'Run Macro' icon.

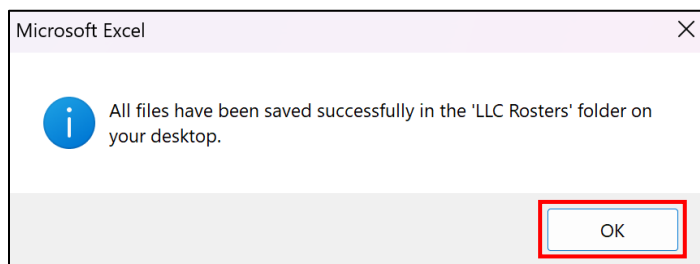

Step 18) A new window will appear. Click on 'Run.'

Note: Do not click on or type anything in the VBA editor when the macro is running. The macro will take about 1 minute to run.

Step 19) After the macro has run, you will receive a success message. Click 'OK.'

Step 20) Navigate to your desktop and you will see an **LLC Rosters** folder. Open the **LLC Rosters** folder.

Step 21) In the **LLC Rosters** folder, you will see all 25 Living Learning Communities (LLCs) rosters.
